

Curriculum, resources & training for
family child care and FFN providers

Child care facts

- ▶ Many child care programs closed permanently due to the pandemic
- ▶ Child care deserts are expanding
- ▶ Families are unable to find quality care
- ▶ CCRR agencies are struggling to:
 - 1) Recruit
 - 2) Train
 - 3) Retain
 - 4) Improve quality

Building the supply and quality of family child care is essential when addressing the child care crisis.

The numbers speak for themselves.

- 40% of all children in child care are in a family child care/home setting
- 94.2% of all family child care providers are caring for at least one infant
- Nationally, one in four children (24%) in family child care are funded by the CCDF

AND YET... between 2014 and 2017, 22% of family child care providers left the field due to lack of support, challenges meeting quality standards and rising costs for materials, like curriculum.

The solution must be multifaceted.

Quality curriculum & resources designed specifically for FCC/FNN providers

Financial support & incentives to promote expansion and quality

Training opportunities for providers & CCRR staff

MUST fit into an FCC/FNN budget

Gee Whiz ... A Comprehensive Solution

▶ Innovative Curriculum:

- ▶ Written specifically for a mixed-age group (home setting)
- ▶ Comprehensive
- ▶ Aligned with state/national ECE standards (approved in many states for QRIS programs)
- ▶ Easy-to-implement with quick on-boarding with online access and delivery
